SUMMARY

Passionate and experienced Full-stack Developer mainly focused on the backend, with 8+ years of hands-on experience developing robust and scalable web applications. I am Proficient in Python, React, and JS programming languages and frameworks like Django, Flask, React, Angular, Vue.js, Next.js, Panda, and Numpy. I am Seeking to leverage my expertise in development to contribute effectively to a dynamic development team.

SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL, NoSQL

Frameworks & Libraries: Django, Flask, React, Angular, Vue.js, Next.js, Panda, Numpy

Relational Database: MySQL, PostgreSQL

Version Control Systems: Git, GitHub, Bitbucket

API Development & Integration: RESTful APIs, WebSocket, Microservices Architecture

DevOps & Cloud: Continuous Integration (CI), Continuous Deployment (CD), Containerization (Docker), Cloud Computing (AWS, Azure, Google Cloud Platform), Heroku

Tools: Docker, Git, Jenkins, Terraform

Technologies: AWS, Azure, Google Cloud Platform, Kafka, Heroku, Databases (SQL, NoSQL), WebSocket, APIs.

Methodologies: Agile Methodologies, Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD), Scrum, Kanban.

Soft Skills: Collaboration & Teamwork, Problem-solving & Critical Thinking, Adaptability & Learning, Time Management & Organization, Attention to Detail, Leadership & Mentorship

Work Experiences

Amperor Tech (Dubai, UAE)

Senior Full Stack Engineer May 2023 - Present

- Worked on optimizing performance and improving user experience in Python-based web applications using Django.
- Using Django and Flask, converted a traditional monolithic application to a microservices architecture.
- Designed and developed robust APIs using Django DRF.
- Wrote reusable code and developed multiple features from scratch while following the best coding practices.
- With Pandas and Numpy, improved data processing and visualization, resulting in better business insights and processing efficiency.

- Encouraged team growth with training sessions on Python, Django, and CI/CD best practices.
- Supported optimization of AWS resource usage through Auto Scaling and AWS Lambda.
- Participated in designing and implementing monitoring solutions using AWS CloudWatch and Datadog, enhancing system visibility and reducing resolution time.
- Designed a tracking and reporting system using AWS.
- Contributed to building and maintaining a fully automated CI/CD pipeline, reducing deployment time.
- Used Git to guarantee code integrity and smooth collaboration.
- Increased project delivery efficiency using Jira.

Beyond Eris Solution

Full Stack Engineer Nov 2019 - Apr 2023

- Improved website load times and user engagement with effective Django query optimization and caching solutions.
- Streamlined development and deployment by improving Django routines and automating critical steps to reduce downtime.
- The primary application was migrated from a monolithic architecture to Django-based microservices, which improved scalability and flexibility.
- Mentored and led an engineering team, dramatically increasing productivity through the use of Python and Django best practices.
- Delivered a significant client project ahead of schedule, gaining praise from both the client and upper management.
- Using Django and React, I created a real-time analytics dashboard to help people make data-driven decisions.
- Led the development of a scalable e-commerce platform using Python and Django, which can handle huge transaction volumes while maintaining exceptional access.
- Championed automated testing in Django, resulting in a significant reduction in post-deployment issues.
- Successfully instructed the migration of the Django application to the cloud, resulting in lower expenses and no delays.

Cloud Allied

Python Engineer Apr 2017 - Sep 2019

- Architected and engineered RESTful APIs with Python and Django, enabling effortless integration with external systems.
- Enhanced user experience and engagement by 25% with React, HTML, and CSS interfaces.
- Led designing and implementing a customized Salesforce CRM platform for a leading retail chain, increasing sales team productivity and customer satisfaction scores.
- Crafted and enforced Salesforce best practices and governance policies, maintaining a 99.9% system uptime and ensuring high data quality standards.
- Improved database performance utilizing regional databases, increasing the speed and dependability of data retrieval.
- Optimized AWS resource usage, reducing operational costs by 15%.
- Contributed significantly to the creation and upkeep of reliable CI/CD pipelines using Jenkins to deliver software upgrades efficiently.
- Automated CI/CD pipelines with Jenkins and Docker, cutting release times and deployment errors.
- Deployed and managed high-availability web applications on Heroku.

EDUCATION

National University of Science and Technology 2013 - 2017

Bachelor of Science in Computer Science, CGPA 3.41
