Summary

Experienced full-stack developer with a strong background in building scalable web applications. Proficient in both front-end and back-end technologies, with a focus on delivering high-quality, user-friendly solutions. Demonstrated ability to collaborate with cross-functional teams and contribute to open-source projects.

Technical Skills

Languages: Python, JavaScript, HTML, CSS, SQL

Front-end: Vue.js, React

Back-end: Node.js, Express.js, Flask

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, Docker, Kubernetes, Github Actions

Cloud Platforms: AWS, Azure, Google Cloud

Professional Experience

Full-Stack Developer at GitHub Suburban Fibre Company

Developed and maintained web applications using Vue.js for front-end and Node.js with Express.js for back-end services.

Designed and implemented RESTful APIs to facilitate seamless communication between client-side interfaces and MongoDB databases.

Collaborated with cross-functional teams to integrate new features and ensure high-quality code through code reviews and testing.

Deployed applications on AWS, ensuring scalability and high availability.

Full-Stack Developer at Legend

Led the development of a responsive e-commerce platform with a React front end and a Node.js/Express.js back end.

Implemented user authentication and authorization using JWT, ensuring secure access to user-specific features.

Designed a PostgreSQL schema to efficiently store product, user, and order information, supporting complex queries and data relationships.

Integrated third-party payment gateways to facilitate seamless and secure transactions.

Projects

E-commerce Platform

Developed a responsive e-commerce platform with a Vue.js front end and a Node.js/Express.js back end, enabling users to browse products, manage shopping carts, and process payments.

Implemented user authentication and authorization using JWT, ensuring secure access to user-specific features.

Designed a MongoDB schema to efficiently store product, user, and order information, supporting complex queries and data relationships.

Integrated third-party payment gateways to facilitate seamless and secure transactions.

Student Math Score Predictor with Deployment

Developed a machine learning solution to predict student performance in math based on various factors using regression algorithms like Linear Regression, Random Forest, and XGBoost.

Performed hyper-parameter tuning and model evaluation to select the best model, achieving high accuracy and low error rates.

Deployed the model on AWS Elastic Beanstalk and Azure Web App, providing an easy-to-use web interface for predictions.

Implemented continuous delivery pipelines for automatic deployment and updates.

Education

Bachelor of Science in Electronics and Computer Engineering
